SoarSoft Software CompuFoil3D program for airfoil plotting and lofting. Many of the utilities apply to multiblock structured grids and flow solutions, but numerous other reusable modules in such categories as interpolation, optimization, quadrature, rapid searching, and character manipulation appear from several decades of software development in the Aerodynamics Division and Space Technology Division at NASA Ames Research Center. There are numerous collections of well-written and well-documented procedures that are useful for diverse applications. Paul Gelhausen and Sam Wilson. Axel Rohde. The toolset is designed with computational fluid dynamics and aerodynamic shape optimization in mind, but is extensible to treat arbitrary sets of governing equations such as potential flow, electrodynamics, chemically reacting flows, and many others. However, I haven't checked out all of the software, so this is not a professional recommendation. Didier Breyne, It is to become a software repository, but right now it is more promise than delivery.
